Professional Summary

Software Engineering undergraduate with a strong foundation in Object-Oriented Programming (OOP) and full-stack development. Proven ability to build database-driven applications using modern frameworks like Next.js and Java. Seeking a Software Engineer Intern role to apply academic knowledge to real-world software delivery and contribute to scalable solutions.

Education

Sri Lanka Institute of Information Technology (SLIIT) Colombo, Sri Lanka
BSc (Hons) in Information Technology (Specialized in Software Engineering) Expected Graduation: [2028]

St. Mary's Convent Matara, Sri Lanka
Advanced Level (A/L) Results: Combined Mathematics: C, Physics: S, Chemistry: S

Technical Skills

- **Languages & Web:** Java, Python, JavaScript, Next.js, HTML, CSS, Tailwind CSS
- **Databases:** MySQL (Relational Database Design, SQL Queries)
- **Tools & DevOps:** Git, GitHub, IntelliJ IDEA, Radix UI
- **Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms, SDLC, Agile/Scrum

Key Projects

Bike Rental and Ride-Sharing Platform — *Java, MySQL, OOP* [2025]

- Engineered a booking and payment system using **Java**, applying OOP principles to ensure code modularity and maintainability.
- Integrated a **MySQL** database to manage user profiles and ride history, optimizing data retrieval speeds for transaction logs.
- Collaborated with a team of peers using **Git/GitHub** for version control, ensuring zero merge conflicts during the integration phase.

Web-based Apartment Sales System — *HTML, CSS, JavaScript* [2025]

- Implemented a responsive client-facing booking module using **Web Technologies**, improving user accessibility across mobile and desktop devices.
- Executed project deliverables within an **Agile** environment, participating in iterative development cycles to meet strict academic deadlines.

ErrorXplorer — *Next.js, Tailwind CSS, Radix UI, MySQL* [2025]

- Developed a centralized error tracking application using **Next.js**, allowing developers to query and filter detailed logs for rapid debugging.
- Designed an accessible, high-performance UI using **Radix UI** and **Tailwind CSS**, reducing time-to-resolution for critical software bugs.
- Implemented structured log storage with **MySQL**, ensuring reliable data persistence and easy tracking of error history.
